

Verint IP Camera Security Ecosystem

Not all IP cameras are created equal. At Verint we believe that our IP cameras are not just cameras, but a key to unlocking the true value of one of the most powerful security ecosystems in the industry. By combining Verint's IP cameras with Verint's EdgeVMS video management system, customers now have the tools necessary to keep people, property and information safe while mitigating risk, staying compliant and reducing cost.

Cyber threats and network vulnerabilities continue to increase for organizations all around the world. As a result, the maintenance and continuous upgrades of the system itself are mission-critical. Maintaining a complex security system can be costly and time consuming when you consider executing firmware updates, ensuring password hygiene standards and even gaining access to third-party assets on the network.

When customers choose to combine the quality of Verint's IP cameras with the power and flexibility of the Verint® EdgeVMS they can:

- Leverage Verint Op-Center™ to maintain the latest firmware version on all cameras through a single user interface with a single user action.
- Reduce costs of maintaining the system by minimizing effort and eliminating costly onsite visits to update cameras firmware.
- Improve security of the system by ensuring that all of endpoints have the latest Verint camera firmware available.
- Make it easy to follow internal guidelines and industry best practices through updating all Verint IP camera passwords with a single command from EdgeVMS Op-Center.
- Maintain compliance with a variety of standards and policies:
 - Payment Card Industry Data Security Standards
 - Federal Financial Institutions Examination Council (FFIEC)
 - Sarbanes-Oxley Act
 - Gramm-Leach-Bliley Act

Additionally, many organizations, especially in the financial industry, forbid third-party laptops to be connected to any part of the network including IP cameras. With Verint IP cameras, customers are not impacted by this restriction when using the network approved EdgeVMS Op-Center and EdgeVMS Vid-Center™ applications to configure cameras.

Key Values

- Lower Total Cost of Ownership
- Improved Security
- Improved Compliance

The chart below represents just a few of the benefits customers realize in choosing Verint as the single source for both IP Cameras and a Video Management System.

FEATURE	BENEFIT
Direct Camera Setup	Ability to connect directly to an individual IP camera remotely for setup and configuration
Better Security	Support for Https/SSL connections on Verint cameras with the EdgeVMS platform
Ability To Perform Bulk Firmware Updates	Dramatically reduce costs associated with manual camera updates
Central Reporting Capabilities	Quickly identify when cameras are not functioning
Audit Reporting	Ensure that all cameras are up to date and in compliance with corporate standards
Centralized System Administration	Lower costs through more efficient camera setup and maintenance
Power Cycle Cameras	With the network switch integration, if a camera failure is detected, the system will automatically power cycle the camera in an attempt to recover it
Manually Power Cycle IP Cameras	Through our network switch integration, administrators can reset cameras remotely if trouble occurs reducing the requirement and costs associated with an onsite service call
Auto Discovery of Verint Cameras	Lower costs of installation by automatically connecting the cameras to the system, eliminating mistakes and reducing installation time
Camera SD Card Backup	Increases resiliency – if network fails, video is captured directly on the camera and valuable data is maintained and moved back to the EdgeVR when network connectivity is restored.
Single Sourced Provider	Reduce total cost of ownership and increase return on investment through greater continuity and optimal performance of cameras that are taking full advantage of the Verint ecosystem
Unmatched Services and Support	Faster resolution of issues with a team familiar with the entire Verint ecosystem

Powered by our IP camera offering and video management software, Verint offers is a powerful portfolio designed to help customers increase efficiency, reduce cost and realize a greater return on their security technology investments. Call us today to hear more about Verint solutions and how you can unleash the full benefit of these tools.

Verint. Powering Actionable Intelligence®

Verint® Systems Inc. (NASDAQ: VRNT) is a global leader in Actionable Intelligence® solutions for customer engagement optimization, security intelligence, and fraud, risk and compliance. Today, more than 10,000 organizations in over 180 countries use Verint solutions to improve enterprise performance and make the world a safer place. Learn more at www.verint.com.
