

Ten Reasons to Choose Verint® EdgeVMS

ENTERPRISE MANAGEMENT AND HEALTH CHECK

Automates system health monitoring and diagnostics including:

- Auto Camera Verification
- Permission Management (Active Directory)
- Mapping
- Custom reporting—AP Accountability on system usage

SCALABILITY

Designed to support large, highly dispersed retail footprints. Hardware supporting 4 to 64 Cameras.

FACIAL DETECTION WITH CENTRAL SEARCH AND DATABASE

- Organized Retail Crime (ORC) Federated Fraud Search
- Real-Time Watch List Capabilities

FRAUD DETECTION

Identifies transactions with no customer present (aka Return Lane Fraud).

IMPROVE STORE PERFORMANCE

Tools to reduce queue lines, optimize retail staff levels and enhance employee training.

EXCEPTION TRANSACTION REPORTING

Integrates with over 400 Retail-type Transaction systems.

CONVERSION MEASUREMENT

Offers People Counting and reports additional conversion data to help analyze patterns to streamline losses and maximize profitability

SUPERIOR CUSTOMER EXPERIENCE

Real-time tools that help retailers understand and manage store performance, and deliver a positive customer experience.

CASE MANAGEMENT

Organize investigations across multiple locations with the ability to link multiple video clips and other data related to a case that enables data to be shared easily with peers or law enforcement.

FLEXIBILITY

Integrates with legacy or new systems, centrally manages multiple sites and integrates with third-party systems including POS, face and license plate recognition, alarm monitoring and more. Easily accepts multiple file types for transaction integration.
