

Verint Guard Center

Manage Live Video Views for Real-Time Situational Awareness.

Verint® Guard Center™ enables banks to monitor corporate locations, administration properties and cash vaults in real-time on a video wall in a command-and-control environment. Leveraging video from existing Verint EdgeVR® devices to empower situational awareness and live response, Guard Center is specially tailored for the real-time, command-and-control environment and allows security personnel to monitor up to 96 live camera views simultaneously. Guard Center is a simple and direct replacement for traditional analog matrix solutions, and familiar keypad and joystick controls facilitate transition of any command-and-control center to a networked video environment without additional training of the workforce.

Guard Center provides on-site security personnel live views from throughout a corporate or administration facility. Its flexible operation can be tailored to each facility's needs, whether the application is a sophisticated command-and-control system or camera views displayed at a front reception desk.

Features of Verint's Guard Center include:

- Live video on up to six monitors. Each monitor can display up to 16 cameras, allowing live monitoring of a maximum of 96 camera views.
- Full-screen mode. Less text is displayed on the screen to maximize the video image size and to direct focus to the all-important video view.
- Creation of multiple profiles. Users can customize how video is displayed in various situations, based on inputs from access control, intrusion and other building systems.
- Interfaced with Verint Instant Alerts. Guard Center can automatically pop up particular cameras when a selected event occurs. For example, a video image with a red flashing border could be displayed when an unauthorized door is opened.
- Live pan-tilt-zoom (PTZ) control. Operators can hone in for a close-up view of any event in real-time. The live interface promotes efficient use of security personnel, who now have immediate access to any video view throughout a facility.
- Easy permission management. Guard Center interfaces with Verint's Op-Center™ to manage permissions restricting which cameras are displayed.

Guard Center allows users to get live views from throughout a corporate or administration facility.

Key Benefits

- Each monitor can display up to 16 cameras
- Live monitoring of a maximum of 96 camera views
- Maximize the video image size with direct focus on important details
- Automatically display camera alerts when a selected event occurs
- Connect to multiple EdgeVR's over multiple locations

Guard Center adds a new dimension to Verint's suite of solutions for banks, building on the widely used capabilities of Vid-Center™ and EdgeVR to monitor remote sites. Remote systems leverage the forensic capabilities of video but are usually not monitored in real-time. In contrast, Guard Center enables proactive response to any event as it unfolds live. Larger corporate locations and cash vaults especially require live monitoring manned by security personnel.

Guard Center's focus on real-time monitoring expands the range of choices for Verint's banking customers in an environment previously dominated by outdated matrix switches and analog cameras. Analog systems are nearing end-of-life; service and availability of parts can be a problem. Guard Center provides a path to enable customers to update to the latest in networked video while maintaining operational protocols and efficiencies. The system also leverages existing EdgeVR and other devices while greatly expanding the customer's video capabilities in the short- and long-term.

SPECIFICATION	
• Maximum Number of Monitors per Workstation	6
• Maximum Number of Cameras per Guard Center	96
• User Management	Op-Center or Op-Center Basic Required for proper operation
MINIMUM WORKSTATION SPECIFICATION	
• Processor	Intel Xeon E5-1650 or better
• RAM	8GB
• Hard Disk Drive	500GB
• Video Card to support 6 Monitors	2 x NVIDIA Quadro NVS 510 * adaptor cables required for connection to monitors.
• Operating System	Windows & Professional 64 Bit
PRODUCT NUMBERS	
• VC-GC-BASE	Guard Center License, including support for one monitor. Order VC-GC-MON to connect extra monitors. First year of Gold Software Maintenance required.
• VC-GC-MON	Guard Center License per monitor connected to the workstation. Maximum of 6 monitors supported per workstation. First year of Gold Software Maintenance required.

Verint. Powering Actionable Intelligence®

Verint® Systems Inc. (NASDAQ: VRNT) is a global leader in Actionable Intelligence® solutions for customer engagement optimization, security intelligence, and fraud, risk and compliance. Today, more than 10,000 organizations in over 180 countries use Verint solutions to improve enterprise performance and make the world a safer place. Learn more at www.verint.com.
