

Verint IP Camera Ecosystem

Key Features:

- Lower Total Cost of Ownership
- Improved Security and Compliance
- Easy Setup and Deep Integration

Verint IP Camera Ecosystem

Not all IP cameras are created equal. By combining Verint's IP cameras with Verint's EdgeVMS video management system, customers now have a seamless integration with all the tools necessary to keep people, property and information safe while mitigating risk, staying compliant and reducing cost. Verint cameras can be configured and maintained remotely which makes administration a snap and saves you time and money.

When customers choose to combine the quality of Verint's IP cameras with the power and flexibility of the Verint® EdgeVMS they can:

- Trust that Verint cameras work better with Verint EdgeVR's through our deep and thorough integration.
- Reduce costs of maintaining the system by minimizing effort and eliminating costly on-site visits to update camera firmware.
- Improve security of the system by ensuring that all of endpoints have the latest Verint camera firmware available.
- Make it easy to follow internal compliance guidelines and industry best practices through updating all Verint IP camera passwords with a single command from EdgeVMS Op-Center.
- Leverage EdgeVMS Op-Center to maintain the latest firmware version on all cameras through a single user interface with a single user action.
- Maintain compliance with a variety of standards and policies:
 - Federal Financial Institutions Examination Council (FFIEC)
 - Sarbanes-Oxley Act
 - Gramm-Leach-Bliley Act

VERINT®

Verint IP Camera Ecosystem

The chart below represents just a few of the benefits customers realize when choosing Verint as the single source for both IP cameras and a video management system.

FEATURE	BENEFIT
Central Password Management	Change passwords on some or all of your Verint cameras easily with Verint Op-Center
Central Firmware Management	Update camera firmware on all cameras centrally and easily with Verint Op-Center
Camera Image Adjustment	Adjust common IP camera settings directly through the NVR without having to install any browser add-ons
Audio Recording	Record audio from Verint IP cameras that support audio capability
Remote Audio Out	Send pre-recorded audio messages down to be played through a Verint camera with an amplifier and speaker attached
Auto Config Cameras	Easily discover and add Verint IP cameras to your NVR using this feature, no need to set up an IP address in the camera first
Integrated Motion and Privacy Masking	Easily configure motion detection areas and privacy masking through the NVR remotely
Integrated Live and Recording Profiles	Easily configure resolution and frame rate settings directly in the NVR setup and configuration pages
Secure Connections	Support for https/SSL connections with the NVR, and are tested regularly for potential cyber security vulnerabilities
SD Card Backup	Backup video data to SD card in the event of network failure, including automatically restoring video to the NVR when the network is available
Great Image Quality	Image settings on the camera are optimized for most financial industry environments at the factory to help ensure the best picture quality upon installation
Lower Cost of Ownership	Verint cameras can be configured and managed centrally, reducing time and effort
Single Sourced Provider	Reduced total cost of ownership and increased return on investment through greater continuity and optimal performance of cameras that are taking full advantage of the Verint ecosystem
Unmatched Services and Support	Fast resolution of issues with a team trained and familiar with the entire Verint ecosystem

Powered by our IP camera offering and video management software, Verint offers is a powerful portfolio designed to help customers increase efficiency, reduce cost and realize a greater return on their security technology investments. Call us today to hear more about Verint solutions and how you can unleash the full benefit of these tools.

World-Class Service and Support

At Verint, we are dedicated to the success of our partners and customers. To this end, we've developed world-class customer support programs and service offerings featuring live technical support, web-based resources, advanced replacements and a host of on-site professional services.
